

Lost Pet Tips

1. Make sure you have current and clear pictures of your lost pet to post on social media and to make flyers.
2. Start looking! Place items like food and water bowls, blankets and bedding and litterbox outside. Both lost dogs and cats return to the area that they were lost from often. Look in any spot that your pet could be hiding in (i.e.. in bushes or open sheds/outbuildings...etc.) For lost cats, double check inside the home. Cats can get stuck in closets, basements, or any other small space that they can fit in.
3. Check regularly with local animal shelters, recues, veterinarian offices and police stations.
4. Print flyers with current pictures and information and post in the area the pet went missing. Speak with neighbors. Word of mouth is critical for sightings.
5. Post lost pet statements on social media. Facebook & Craigslist can be extremely helpful in locating lost pets.
